**Subject:** Invitation to Speak at the Independent Petroleum Association of America Meeting -- Austin, TX -- June 25, 2018

Administrator Idsal,

We have met a couple of times – at the DEPA meeting in Oklahoma City and at the EPA Oil and Gas Roundtable in Denver – and I have been impressed by your willingness to reach out to the oil and natural gas production industry to discuss the EPA regulatory issues it faces. I want to invite you to the Independent Petroleum Association of America Midyear meeting that will be held in Austin, Texas. More specifically, I would like to request that you speak at a portion of the meeting where we look at environmental issues – generally regulatory – that independent producers need to address. This portion of the meeting will be during the morning of June 25 from 9:00 until noon and we could work with your schedule to accommodate your availability within that time frame. The meeting is generally attended by independent producer executives and environmental compliance professionals.

Please let me know if you are available and interested and I will provide you with the necessary details.

Thank you for your consideration,

Lee Fuller
